

MASL D309107 - Medical Readiness Principles of Food Protection - 5 days, class size 30: Provides a food safety / defense capability to enhance force health protection by decreasing the risk of food & waterborne disease. **Target Audience:** Personnel associated with food, water operations & preventive medicine professionals.

MASL D309108 - Mitigating Foodborne Risks During Deployments - 5 days, class size 30: Demonstrates a cost-effective, risk-based approach to mitigate food & waterborne risks in an austere environment. **Target Audience:** Veterinary, public health & preventive medicine professionals.

MASL D309053 - Operational Preventive Medicine - 5 days, class size 50: Assists medical personnel & commanders to develop preventive measures to protect the health & strength of deployed forces. Topics include: pre-deployment readiness, health threats & post-deployment screenings. **Target Audience:** Commanders, physicians, nurses, public healthcare officials & medical personnel.

MASL D309088 (E-IMET) - Gender-Based Violence (GBV) - 5 days, class size 50: Addresses program development for domestic violence & sexual assault. Considers GBV issues relevant to peacekeeping forces, including safety of women in military service, after disasters & during migration. **Target Audience:** Mil-Civ medical planners, commanders, peacekeeping forces, law enforcement, social work and medical responders to domestic & sexual violence.

MASL D309105 (E-IMET) - Gender-Based Violence (GBV - II) Leadership Course: Phase II - 5 days, class size 50: Builds on the introductory course with leadership workshops & interagency tabletop exercises to improve victim experience, prevention efforts and increase program cooperation. **Target Audience:** Section chiefs for sexual assault, domestic violence and peacekeeping efforts, including healthcare, social work, law enforcement, judiciary, military.

MASL D309100 (E-IMET) - Outbreak Detection & Response - 5 days, class size 50: Builds capacity for disease surveillance, recognition, case management & outbreak response coordination. Review lessons learned from recent epidemics. Supports the IHR and Global Health Security Agenda. **Target Audience:** Epidemiologists, public health officials, healthcare & lab personnel.

MASL D309059 (E-IMET) - Infection Control in Ebola & Pandemic Management - 5 days, class size 50: Provides instruction & exercises in planning for safe & effective medical care during outbreaks such as Ebola and pandemic influenza. Includes hands-on proficiency testing with medical protective equipment. **Target Audience:** Health emergency management, infection control & healthcare personnel who encounter dangerous contagious diseases.

MASL D309106 - Malaria & Other Infectious Disease Threats - 5 days, class size 50: Enables development an end-to-end malaria control program for deploying forces. Includes table-top exercises in medical risk assessment, vector control, personal protection, diagnosis / medical management / monitoring / evaluation. **Target Audience:** Entomologists, public health, preventive medicine, healthcare workers, military line commanders.

Resident Courses - San Antonio, Texas

MASL D175466 (E-IMET) - Executive Healthcare Resource Management - 2 weeks, class size 15, ECL: 80: Utilizes group discussions & classroom exercises to discuss healthcare systems, managed care tools, quality & performance improvement applications & processes to improve access and quality of care using existing resources. **Target Audience:** Mil-Civ government medical administrators.

MASL D175134 (E-IMET) - Gender-Based Violence (GBV) & Women's Health - 5 days, class size 50, ECL: 70: This seminar addresses domestic violence, sexual assault, child marriage, war & peacekeeping operations. Emphasizes program development & measuring outcomes. Includes a field visit to a shelter for victims of domestic violence. **Target Audience:** Decision-makers for women, peace and security programs, ministry of health, law enforcement, judiciary, medical / social program advocates.

MASL D175467 (E-IMET) - HIV / AIDS Planning & Policy Development - 5 days, class size 50, ECL: 70: Addresses key HIV programs: screening, diagnosis / treatment, opportunistic infection, monitoring / evaluation, & special populations. Participants share challenges & best practices with country presentations. Includes a site visit to a non-profit organization providing HIV services for the indigent. **Target Audience:** Senior mil-civ in policy & program development, implementation & treatment.

Needs Assessment

MASL D305041 - Training Needs Assessment / Site Survey 2 - 5 days: Designed to survey, assess needs, formulate future medical training needs & establish sustainable programs. Conducts on-site visits, interviews with staff, planners, & leadership while developing. **Target Audience:** Our partner nation's facilities.

DEFENSE INSTITUTE FOR MEDICAL OPERATIONS

2018
COURSE PAMPHLET

Health System Management

MASL D309044 (E-IMET) - Nursing Administration - 5 days, class size 45: Addresses 3 “WHO” areas to strengthen skilled nurses in your country: positive practice environment, nursing leadership & retention. 48% interactive curriculum. **Target Audience:** Mil-Civ nursing leaders.

MASL D309028 (E-IMET) - Health Resource Management - 5 days, class size 50: Provides healthcare leaders methods to improve the financing, delivery & organization of healthcare in their country. Topics on personnel recruitment, selection, training, productivity, compensation & evaluation. **Target Audience:** Mil-Civ assigned to healthcare management positions.

MASL D309042 (E-IMET) - Health Systems Development - 5 days, class size 50: Focuses on ways to improve access to care, resolve healthcare management challenges, & develop effective & efficient administration policies / procedures at the facility level. **Target Audience:** Mil-Civ assigned to healthcare management positions.

Bioterrorism / Chemical / Radiological Threats

MASL D309020 (E-IMET) - Biological Weapons & Emerging Security Threats - 5 days, class size 50: Prepares participants to recognize & respond to bioterrorism & to ensure the continued function of vital healthcare infrastructure. Focuses on hospital-based planning. **Target Audience:** Mil-Civ providers, first responders, lab officers, epidemiologists & medical administrators.

MASL D309090 (E-IMET) - Chemical Agent Emergency Management - 5 days, class size 50: Addresses incident site and hospital based medical care of patients injured by chemical weapons or toxic industrial chemicals. Extensive exercises practicing emergency reception, decontamination & definitive medical care. **Target Audience:** Healthcare, emergency management & first responders.

MASL D309082 - Chem / Bio / Rad / Nuc (CBRN) Incident & Medical Response - 5 days, class size 50: Addresses incident management & initial hospital response to CBRN events. Exercises proper use of personal protective equipment, decontamination, facility protection, & initial definitive hospital-based management of victims. **Target Audience:** Healthcare, first responders, lab officers & administrators.

MASL D309058 (E-IMET) - Laboratory Biosecurity & Biosafety - 5 days, class size 50: Addresses risks from dangerous pathogens in clinical and research labs. Covers risk assessment, exercises, responsible science, Biological Weapons & Toxins Treaty obligation. **Target Audience:** Mil-Civ, national security, medical planners, lab directors, public health officers & epidemic response officials.

Medical Skills Training

MASL D309068 - Basic First Responder for Non-Medics - 5 days, class size 45: Provides self-aid, buddy care & basic life support skills. Enhances the ability to recognize life threatening injuries, to perform basic life-saving interventions & improve the victims chances of survival. **Target Audience:** Mil-Civ non-medical first responders.

MASL D309055 - MASCAL Response for Healthcare Personnel - 5 days, class size 40: Improves basic trauma skills for medical personnel & provides a prioritized approach to medical management of critically injured patients following an event. **Target Audience:** Mil-Civ first-responders.

MASL D309046 - Casualty Evacuation (CASEVAC) - 5 days, class size 25: Provides basic aeromedical evacuation principles & training for rotary & fixed wing aircraft, in the unique requirements for en route care. **Target Audience:** Healthcare personnel who conduct patient transport.

MASL D309083 - Burn Trauma - 4 days, class size 25: Combines medical / surgical lectures with hands-on skill stations to sharpen improve capabilities using the latest techniques to care for critically burned trauma patients. **Target Audience:** Physicians, nurses & providers of burn care management.

MASL D309045 (E-IMET) - Trauma Nursing - 5 days, class size 45: Provides a combination of didactic & hands-on training to nurses, focusing on the skills required to care for trauma & critically ill patients. Training is applicable to daily nursing practices & in mass casualty situations. **Target Audience:** Nurses who manage trauma & critically ill patients.

MASL D309025 - Surgical Trauma Response Techniques (STRT) -5 days, class size 24: The STRT course combines lectures & actual “hands-on” lab exercises that enable surgeons to sharpen / improve skills using the latest techniques from lessons learned in forward trauma field hospitals. **Target Audience:** Surgeons & physicians who are first-level care providers to traumatically injured patients.

MASL D309022 - En Route Critical Care (ECC) - 5 days, class size 24: Provides advanced hands-on training necessary to care for critically ill / injured patients in flight. The students will apply skills to simulated critical patients within the host nation's aircraft, providing familiarization with medical equipment & patient management. **Target Audience:** Critical care providers & nurses.

MASL D309018 (E-IMET) - Mental Health Services After Disasters & Combat - 5 days, class size 50: Addresses the mental health impact of disasters & combat. Provides proven methods to minimize consequences of Post Traumatic Stress Disorder to facilitate resiliency & improve reintegration. **Target Audience:** Line commanders, mil-civ medical, social workers, counselors & mental health professionals.

MASL D309110 - International Trauma Life Support (ITLS) - Instructor to Student ratio 1 to 6: Provides certification in ITLS for medical personnel who respond to trauma in an austere / combat environment. Subsequent iterations “train the trainer” who can then independently teach & certify. The final step may include partner nation training chapter capability. **Target Audience:** Mil physicians, nurses, paramedics & first responders.

Disaster Planning

MASL D309041 (E-IMET) - Disaster Planning (Basic) - 5 days, class size 50: Introduces elements for building a national disaster plan, integrating local & regional response capabilities into the nation's emergency management system. **Target Audience:** Planners & emergency response personnel. Combined mil-civ groups are ideal.

MASL D309057 (E-IMET) - Disaster Planning (Advanced) - 5 days, class size 50: Evaluates and exercises the host nation's current disaster response plan & introduces enhanced emergency management concepts intended to improve interagency coordination. **Target Audience:** Planners & emergency response personnel. Combined mil-civ groups are ideal.

MASL D309070 (E-IMET) - Disaster Planning & Emergency Management (Senior Leaders) - 2 Days, class size 20: Prepares leadership for national disaster management, including implementing national emergency management strategies, continuity of operations & government. **Target Audience:** Senior officials involved in planning & emergency management.

MASL D309113 - Emergency Operations Center (EOC) Leadership - 5 Days, class size 50: Provides national & local authorities the ability to establish / organize an EOC that directs, manage response, recovery resources & activities. Operationalizes concepts taught in the disaster planner courses. **Target Audience:** Operations, planning, logistics.

MASL D309080 (E-IMET) - Medical Support / Humanitarian Assistance / Disaster Response - 5 days, class size 50: Provides consequence management & emergency medical interventions immediately following a disaster. Features a progressive multiday, multiagency tabletop exercise & rapid assessment. **Target Audience:** Healthcare & emergency management officials.

MASL D309017 (E-IMET) - Public Health Emergencies - 5 days, class size 50: Strengthens host nation's core capacity to prepare for & manage public health emergencies. Focuses on infectious disease, environmental health, outbreak & disease surveillance. **Target Audience:** Medical professions involved with public health.

MASL D309011 (E-IMET) - Regional Trauma System Development & Management - 5 days, class size 50: Trains trauma director & staff to develop / improve the national & regional emergency trauma management system. **Target Audience:** Regional trauma planners, medical administrators, surgeons, physicians & nurses.

Global / Public Health

MASL D309040 (E-IMET) - Leadership Course in HIV / AIDS Program Development - 5 days, class size 50: Assists in developing a national strategy for program design & management. Course provides instruction in diagnosis, treatment & implementing treatment plans. **Target Audience:** Mil-Civ clinicians, nurses, lab & program managers.

MASL D309094 - Ebola for UN Peacekeepers - 2 days, class size 100: Teaches peacekeeping troops & first responders how to recognize people with Ebola Virus Disease; develop competence in Personal Protective Equipment (PPE) use & understand strategies for patient triage, movement, transfer. **Target Audience:** Peacekeeping troops, commanders & medics.

MASL D309069 (E-IMET) - Infection Control & Hospital Epi. Program Development - 5 days, class size 50: Create, implement & monitor guidelines to reduce hospital infections & improve healthcare worker safety. To include: infection surveillance, isolation standards, lab integration. **Target Audience:** Policy writers, epidemiology, infection prevention, lab, medical & nursing staff.
